

Bash Scripting 101

Héctor Fabio Jiménez S. @c1b3rh4ck

Semillero de Investigación Pulpa
UTP

Enero de 2014

Agenda

- 1 Introducción
- 2 Some \LaTeX Examples
 - Tables and Figures
- 3 Python Code
- 4 Contacto
- 5 Pausitas y Over

Que es una shell?

“Es un interprete de comandos que te permite introducir ordenes para comunicarse directamente con el nucleo.”

Tables and Figures

- Use `tabular` for basic tables — see Table ??, for example.

Tables and Figures

- Use `tabular` for basic tables — see Table ??, for example.
- You can upload a figure (JPEG, PNG or PDF) using the files menu.

Tables and Figures

- Use `tabular` for basic tables — see Table ??, for example.
- You can upload a figure (JPEG, PNG or PDF) using the files menu.
- To include it in your document, use the `includegraphics` command (see the comment below in the source code).

Tables and Figures

- Use `tabular` for basic tables — see Table ??, for example.
- You can upload a figure (JPEG, PNG or PDF) using the files menu.
- To include it in your document, use the `includegraphics` command (see the comment below in the source code).

tEST

```
>>> from numpy import *  
>>> from numpy.fft import *  
>>> signal = array([-2., 8., -6., 4., 1., 0., 3., 5.])
```
